

FEIJOA / PINEAPPLE GUAVA

Feijoa Sellowiana

Feijoa or Pineapple Guava (*Feijoa Sellowiana*) is an abundant producing fruit tree with green sweet tasting fruit. The trees are evergreen with dark green and silver foliage. Feijoas are easy to grow and due to their thick foliage, they make a great screening tree or edible hedge!

SKIN

The skin is edible but is quite tart. Eating the fruit whole together with the sweet inside flesh gives a pleasant sweet and sour flavour.

FLOWERS

The petals of the Feijoa are edible and have a sweet feijoa flavour. Carefully pluck petals so that the flower remains to turn into a fruit.

FLESH

Feijoa flesh is sweet and juicy with a pineapple guava type flavour. Allow to ripen off the tree for a sweeter fruit.
